

Client Progress Report – Executive Summary

Date: August 10, 2026
Project: Scope AI (Raft Mental Health & Survey Platform)
Status: Completed & Validated

System Overview

Executive Highlights

1.

 **Automated Safeguarding & Risk Alerts**
Participant responses containing high-risk phrases or indicators of distress automatically trigger immediate email alerts to designated safeguarding leads.
2.

 **AI Grounded in Official Policies**
The AI assistant references official governance and strategy guidelines (*Constitution of The Raft*, *Strategy*, and *Safeguarding Policy*) to deliver accurate, policy-compliant guidance.
3.

 **Enhanced User Chat Experience**
Survey text boxes automatically expand to fit multi-line answers comfortably, with intuitive navigation allowing users to skip optional sections easily.
4.

 **Admin Dashboard & Reporting**
Supervisors can filter flagged participant sessions, monitor safety logs in real time, and export summary data reports.

Key Benefits Summary

Priority Area	Value Delivered
Participant Safety	Instant alerts ensure vulnerable individuals receive prompt attention from safety officers.
Response Accuracy	Direct grounding in organizational guidelines guarantees reliable and policy-compliant AI responses.
User Experience	Expanding text boxes and flexible survey navigation make completing responses effortless.
Management & Oversight	Easy-to-read dashboards and export tools streamline supervisory reviews and audit readiness.
